AC Insertion Probe **ACIP-9025TBBS**

Our **ACIP-9025TBBS** is a universal AC Power Insertion Probe. It is used to insert temporary power into a power inserter without disconnecting any plant cables. Its heavy duty spring loaded pin presses against the seizure screw in the power inserter’s AC input port. It is designed to work with Alpha’s Service Power Supply.

AC Insertion Probe ACIP-9025TBBS

**Remove port covering AC
Input's seizure screw.
(make sure screw is tight)**

**Screw AC Insertion Probe
tightly on port. Then con-
nect service cable's Ander-
son Connectors to AC In-
sertion Probe and connect
to the Alpha Service PS.**
